Proprietary System Solutions

GFB goes beyond reports. We implement scalable technology frameworks that anchor policy changes in real-time data.

Financial Leakage Monitoring System (FLMIP)

A comprehensive national system for tracking financial leakages across government institutions and financial flows.

Bank-Linked Trade Verification Mechanism (BLTVM)

A technical infrastructure linking commercial bank transactions directly to trade documentation for verification.

Trade Payment Formalization Strategy

A structured methodological approach to shift informal payments into the formal financial ecosystem.

Why Governments Choose GFB

- Integrated Approach:** We tackle IFFs, informality, and payment systems simultaneously as interconnected challenges.
- System-Level Solutions:** We don't just provide reports; we build the technical systems that make policy effective.
- Country-Specific:** Implementation is tailored to the unique economic and political landscape of each partner nation.

Ready to Transform?

Whether seeking to assess risks or implement national systems, GFB provides the expertise to support your objectives.
